Office Action Comment	09/826,702	CHUNG, DAE-SUK				
Office Action Summary	Examiner	Art Unit				
	Angel L Casiano	2182				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the o	correspondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.13 after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply - If NO period for reply is specified above, the maximum statutory period w.  - Failure to reply within the set or extended period for reply will, by statute, Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	96(a). In no event, however, may a reply be tir within the statutory minimum of thirty (30) day ill apply and will expire SIX (6) MONTHS from cause the application to become ABANDONE	nely filed  vs will be considered timely.  the mailing date of this communication.  ED (35 U.S.C. § 133).				
Status /						
1) Responsive to communication(s) filed on 04 Au	<u>ıgust 2004</u> .					
This action is <b>FINAL</b> . 2b) ☐ This action is non-final.						
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
closed in accordance with the practice under E	x parte Quayle, 1935 C.D. 11, 4	53 O.G. 213.				
Disposition of Claims						
4)⊠ Claim(s) <u>21-32</u> is/are pending in the application.						
4a), Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6)⊠ Claim(s) <u>21-32</u> is/are rejected.						
· · · · · · · · · · · · · · · · · ·	7) Claim(s) is/are objected to.					
8) Claim(s) are subject to restriction and/or	r election requirement.					
Application Papers						
9)☐ The specification is objected to by the Examine	r.					
10)⊠ The drawing(s) filed on <u>04 August 2004</u> is/are: a)⊠ accepted or b)⊡ objected to by the Examiner.						
Applicant may not request that any objection to the	drawing(s) be held in abeyance. Se	e 37 CFR 1.85(a).				
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) ☐ The oath or declaration is objected to by the Ex	aminer. Note the attached Office	e Action or form PTO-152.				
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:						
1. Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).

## Response to Amendment

Page 2

The present Office action is in response to Amendment dated 04 August 2004.

Claims 1-20 have been canceled. Claims 21-32 are now pending.

#### Drawings

1. Previous Objection to the Drawings has been overcome with the corrections presented in the Amendment.

## Specification

2. Previous Objections to the Specification have been overcome with the corrections included in the present Amendment.

## Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
- 4. Claims 27-28, 30, and 31-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 5. Claims 27-28 and 31-32 recite the limitation "method" in reference to claims 25-26 and 29-30, respectively. However, the parent claims disclose a computer system (claim 25) and a computer-readable medium (claim 29). There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2182

6. Claim 30 recites the limitation "usable" in reference to claim 29. However, claim 29 discloses a computer-readable medium. There is insufficient antecedent basis for this limitation in the claim.

# Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 8. Claims 21, 25, and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Gupta [US 6,212,565 B1].

Regarding claim 21, Gupta teaches a *method* for operating a computer system, including the step of storing a network address (see Abstract). In addition, the prior art teaches selecting a network address, *extracting* a truncated (see "root"; col. 8, lines 21-24) address from the network address ("URL"). This extraction is in response to the utilization (entering; col. 7, lines 63-67 to col. 8, lines 1-6) of a network address (URL) with the purpose of gaining access to the resource (web page). The resulting address is then stored with thin the computer system (see Abstract; col. 3,

Art Unit: 2182

lines 38-62). The prior art teaches the steps of "acquiring" and copying" as performed without

user intervention (see "automatically", col. 3, lines 58-62; col. 7, line 65).

Regarding claim 25, this constitutes the computer system for implementing the method disclosed

in claim 21. The prior art teaches the limitations corresponding to claim 21. Accordingly, the

present claim is rejected under the same basis.

Regarding claim 29, this constitutes the computer-readable medium for implementing the

method disclosed in claim 21. The prior art teaches the limitations corresponding to claim 21.

Accordingly, the present claim is rejected under the same basis.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject

matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary

skill in the art to which said subject matter pertains. Patentability shall not be negatived

by the manner in which the invention was made.

10. Claims 22-24, 26-28, and 30-32 are rejected under 35 U.S.C. 103(a) as being

unpatentable over Gupta [US 6,212,565 B1] in view of Osaku et al. [US 6,061,738].

As for claim 22, Gupta does not explicitly teach a method including the step of "querying the

computer system for a selection of the network address by one of user of the computer system in

Page 5

response to an activation of an autosave feature". Osaku et al. teaches, "it is common for

computer users to store a URL in a computer file (folder) generally known as a bookmark" (see

col. 1, lines 27-30). One of ordinary skill in the art would have been motivated to combine the

cited disclosures in order to obtain a folder, "for accessing a particular home page" in the future

(see Osaku et al., col. 1, lines 29-30). Nonetheless, this folder is not disclosed at "autosave".

Regarding this limitation, Gupta suggests a folder on a computer usable medium, since it teaches

storing (saving) the network address (see col. 7, lines 1-8). Figure 6 (Gupta) teaches the steps of

accessing a page in response to an automatic request (see col. 7, lines 65-66).

As for claim 23, Gupta teaches the network address viewed as present using a network browser

(see col. 1, line 36; col. 5, line 7).

As for claim 24, Gupta does not teach placing the extracted root address into a predefined folder.

However, Osaku et al. teaches, "it is common for computer users to store a URL in a computer

file generally known as a bookmark" (see col. 1, lines 27-30). Therefore, one of ordinary skill in

the art would have been motivated to modify the method disclosed by Gupta by including

bookmark folder/subfolder, in order to use it "for accessing a particular home page" in the future

(see Osaku et al., col. 1, lines 29-30).

As for claims 26-28, these constitute the *computer system* for implementing the method disclosed

in claims 22-24. The prior art combination teaches or suggests the limitations corresponding to

claims 22-24. Accordingly, the present claims are also rejected under the same basis.

Art Unit: 2182

As for claims 30-32, these constitute the computer-readable medium for implementing the method disclosed in claims 22-24. The prior art combination teaches or suggests the limitations corresponding to claims 22-24. Accordingly, the present claims are also rejected under the same basis.

## Response to Arguments

11. Applicant's arguments filed 04 August 2004 have been fully considered but they are not persuasive.

In the Remark, Applicant argues that the Gupta reference does not teach the step of "automatically storing the extracted root address within the computer system subsequent to the utilization of the network address by the computer system to gain access to the resource", as recited in claim 21. Examiner respectfully disagrees. The prior art teaches selecting a network address, extracting a truncated address from the network address ("URL"). This extraction is in response to the utilization of a network address (URL) with the purpose of gaining access to the resource (web page). That is, the method taught by Gupta utilizes the URL (entered for accessing a web page) and then truncates (extracts) the root address. This is disclosed by the reference from column 7, line 57 to column 8, and line28.

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time 12. policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: 09/826,702

Art Unit: 2182

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing

date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Angel L Casiano whose telephone number is 571-272-4142. The

examiner can normally be reached on 9:00-5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Jeffrey Gaffin can be reached on 571-272-4146. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
